

Specialty Extrusions Design & Manufacture

Giving You The Edge

Extruded Products Custom Made to Your Precise Specifications

ITW Plastiglide has specialized in the design and manufacturing of plastic extrusions for over fifty years. Our numerous capabilities include open profile and tubing production. These specialized extrusions are engineered to provide customers with the highest quality products possible.

Offering a wide range of sizes, colors, and materials, we can meet the many demands of today's marketplace. ITW Plastiglide excels in producing profiles specific to unique project requirements. We invite you to submit a sketch, print, or even a mating part for which we can design and produce the perfect extruded solution.

Serving All Industries

We are dedicated to developing and applying new technologies that deliver effective solutions for all applications. We serve many types of companies in all industries including Building, Cabinetry, Construction, Furniture, and Recreational Vehicle.

Our products are used by:

- Franchises
- Healthcare
- Offices
- Schools
- Suppliers
- Woodworkers

Expert Engineering

Computer-aided engineering and high-tech production ensure that we meet exact requirements for any project. We are capable of holding tight tolerances for critical dimensions and can extrude profiles up to seven inches in diameter with intricate geometry. ITW maintains state-of-the-art in-house tooling and engineering capabilities for precision production. We offer conventional extrusions as well as co-extrusion at the most competitive costs.

Quality Materials

Our expert team can help specify the right material and finish for your product based on your environmental, economic, and durability needs. We can meet all special requirements such as color matching, UV protection, and UL certification.

List of raw materials:

- Butyrate
- Polyethylene
- Polypropylene
- Flexible Vinyl
- Rigid PVC (vinyl)
- High Impact Styrene
- ABS
- Nylon
- PETG
